Monitoring Cassandra with Prometheus

cassandra exporter   debian .   .

1

```
wget https://repo1.maven.org/maven2/io/prometheus/jmx/jmx_prometheus_javaagent/0.3/
```

jar   jar cassandra .   cassandra . **$CASSANDRA_HOME/lib** .

2

```
mv jmx_prometheus_javaagent-0.3.0.jar /home/nava/apache-cassandra-3.11.2/lib/
```

jmx exporter .   cassandra   cassandra .   .

4

```
cd /home/nava/apache-cassandra-3.11.2/conf
```

.

4

```
vi jmx_exporter.yml

####################prometheus jmx #############
JVM_OPTS="$JVM_OPTS -javaagent:$CASSANDRA_HOME/lib/jmx_prometheus_javaagent-0.3.0.jar=7070:/home/nava/apache-
cassandra-3.11.2/conf/jmx_exporter.yml"
##############################################
```

:   .
.   .   .

5

```
systemctl restart cassandra
```

6
